

◆ THE \$500 WEEK · by Fuse Studio

Read This Before You Do Anything Else

Days 5 & 6 — the exact system that turns this course into your first paycheck.

Most people who buy a course like this never open it again. They watch a few videos, feel motivated for a day, and go back to scrolling. That is why most people stay broke.

You are holding the part they never reach.

These two days are not theory. This is the precise, repeatable system I use to find real clients and put a personalised pitch in front of them — the same method that gets beginners their first paid job in their first week. There are people charging \$200 for exactly this. You have it in your hands.

Here is the truth nobody tells you: clients are not hiding. Their names, companies and contact details are sitting in plain sight on Upwork, Google and LinkedIn right now. 95% of freelancers never look. The 5% who do — and who pitch with a personal message — get hired. That 5% is about to be you.

So do not skim this. Do it.

Read every step. Open the tools as you go. Send your first 5 pitches today. One reply changes everything — and the only thing standing between you and that reply is whether you actually follow the next two pages.

Let's get you paid. — Coach Ria

DAY 5

Find real clients and gather their info

Time: 3 hours · Goal: 5 personalised pitches sent today

STEP 1 — Find the right jobs on Upwork

Open Upwork → Search jobs → apply these filters in the sidebar:

Experience level	Entry level + Intermediate
Job type	Fixed-price · Less than \$100 AND \$100 to \$500
Client info	Payment verified
Client history	1 to 9 hires + 10+ hires

Search terms (best first): 'AI UGC', 'UGC video', 'AI content creation', 'AI avatar', 'product video'.

STEP 2 — Confirm you can do it, then collect 3 things

Click into each job post, read the brief carefully. If you can deliver, scroll down to the client's hiring history (under 'Other open jobs by this client' / past freelancers' feedback). You're looking for THREE things:

- The client's first name (from a past freelancer's review like "Great working with Sarah!")
- The client's company / brand name (open past jobs they posted — the brand is often in the title)
- The client's location (shown at the top right of the job post)

Important: if even ONE of those three is missing, SKIP and move to the next job. Don't waste time without all three — you can't find their contacts otherwise.

STEP 3 — Find the client's contact info (Google + ContactOut)

Open a new tab and Google this exact phrase:

"[Client first name]" founder of "[Company name]" "[Location]"

You'll usually find: their full name, LinkedIn profile, company website, sometimes an Instagram. Save the LinkedIn URL.

Now open ContactOut.com → search the full name + location from their LinkedIn → it returns their email, sometimes a WhatsApp/phone. Save everything.

Free alternatives if ContactOut is locked: hunter.io (8 free/mo), rocketreach.co, snov.io. The company website's contact page also often shows the founder's email.

STEP 4 — Pitch on every platform you found

Now you have: their job brief + name + company + email + LinkedIn + (maybe) Instagram + WhatsApp. Use the Claude template on Day 6 to instantly turn all of that into 5 personalised messages — and send them all (the more touchpoints, the higher your reply rate).

DAY 6

Pitch with Claude + Instagram outreach

Time: 4 hours · Goal: 15 pitches sent (5 Upwork-found + 10 Instagram)

STEP 5 — The Claude pitch-writer template

Open Claude (free at claude.ai). Paste this prompt and fill the blanks:

You are an expert AI UGC freelancer pitch writer. From the info below, write me FOUR short personalised outreach messages and a closing strategy.

JOB BRIEF (what the client posted): ____
CLIENT NAME: ____ COMPANY: ____ LOCATION: ____
CLIENT WEBSITE: ____ LINKEDIN: ____ INSTAGRAM: ____

WRITE (clearly labelled, copy-paste ready):

- 1) EMAIL (subject line + body, friendly, under 180 words)
- 2) LINKEDIN MESSAGE (under 220 words)
- 3) LINKEDIN CONNECTION INVITE (under 200 characters, personal)
- 4) WHATSAPP / INSTAGRAM DM (under 80 words, casual)

Then give me a short HOW-TO-SECURE-THE-JOB plan: the 3 things I should say if they reply, the price to quote, and a soft 24h follow-up message.

My offer: AI-generated UGC videos and product ads (faceless, made on phone), 24-48h turnaround, \$50-\$200 per video, unlimited revisions. Portfolio: [link].

STEP 6 — Send on every channel you have

For each job you confirmed (5 today), paste each Claude output into the right app and send. Order: Email first → LinkedIn invite + message → Instagram DM → WhatsApp (if you have it).

Pitch volume: aim for 5 Upwork-sourced + 10 Instagram = 15 pitches/day. Do this for 3 days = 45 pitches. You will get your first job.

STEP 7 — Instagram outreach (10 a day)

1. Search Instagram for small/growing brands in your niche (10k-100k followers — they hire freelancers, not agencies).
2. Look at their last 6 posts. Find ONE specific thing: weak product video, missing UGC, low-engagement reel, etc.
3. DM them with the IG message Claude wrote, opening with that specific observation — never copy-paste a generic pitch.

IG-only template (paste into Claude when you want a quick one):

Write me one Instagram DM (under 80 words) to @[handle] — they sell [what], their last post that caught my eye was [thing]. Offer: 1 free AI-made UGC video for them so they can see the quality, no obligation. End with a question.

STEP 8 — Track everything (your pitch journal)

Open a Google Doc with columns: Date · Client + Source · Channels sent · Status (Sent / Replied / Hired / Ghosted) · Follow-up sent? Update after every pitch — patterns show you what works.

Once you land the job: deliver with Fuse Studio

Log into fuse-studio.netlify.app and use the AI Avatar, Image and Seedance/Kling studios to deliver in HOURS, not days. New members get 12 free credits + 2x credits on any plan (first 50). Use the Viral Presets for cinematic results.

Now: send 15 pitches today. One reply changes your life.
