

How I Made This Skating Ad — 100% with AI

The exact step-by-step I used. No camera. No studio. No crew.
Built start-to-finish inside Fuse Studio.

Real frames from the ad — the model, the product, and the motion were all generated. No real-world shoot.

What you'll need

SETUP

A Fuse Studio account + your photos + your product logo

Everything below happens on fuse-studio.netlify.app.

Free to start — the first 50 members get 2x credits.

Step 1 — Write the prompts with Fuse Reactor (Claude)

PROMPT ENGINE

Let Claude write your scene for you

Open Fuse Reactor, pick Claude, and ask it to write your ad prompt:

```
"Write me a cinematic image-to-video prompt for a golden-hour roller-skating ad at Venice Beach: a confident woman in a white outfit holding a soda bottle, hair-flip spin, camera orbiting her. Make it vivid and specific."
```

Tip: The Prompt Generator gives a guided, tap-to-build version too — and your prompt history is saved so you can reuse winners.

Step 2 — Generate your branded drink

IMAGE + LOGO REFERENCE

Upload your logo as a reference, then prompt the bottle

The engine keeps your real logo on the label.

Premium frosted glass soda bottle, deep teal glass body, glossy metallic gold label, brand wordmark embossed in gold, ice-cold condensation, studio product lighting, commercial advertising photo.

Step 3 — Train your AI Avatar (your face)

AVATAR STUDIO

Upload 4-6 clear front-facing photos and train

Fuse Studio locks your face so every image looks like you.

Tip: Sharp, well-lit, front-facing selfies give the best likeness. Quality beats quantity.

Step 4 — Generate the start frame

AVATAR + EXTRA REFERENCE

Select your avatar, add the bottle as an extra reference

Then describe the opening shot:

Cinematic golden-hour photo on a Venice Beach skate boardwalk, [me] in a white headscarf, white athletic top, white pleated skirt, pink roller skates, gliding while holding the branded bottle, palm trees and sun flare behind, shallow depth of field, 9:16 vertical.

Step 5 — Bring it to life (image -> video)

SEEDANCE / KLING

Take the start frame into the video studio and animate

One prompt turns the still into a moving ad:

She skates toward camera at golden hour, lifts the bottle, takes a confident sip, lowers it with a smile, then a graceful 360 spin as her skirt and scarf flow, camera orbits her, cinematic slow-motion.

Step 6 — Caption it & post

EXPORT

Add your caption + end-card, download, post

An entire ad — made on your phone, in minutes.

Your turn.

Make your first one free. First 50 members get 2x credits.
